BULLETPROOF DEFENCE

Duelstone secures an immovable market position through the model's built in natural **high switching costs** that brands would encounter in moving to another platform.

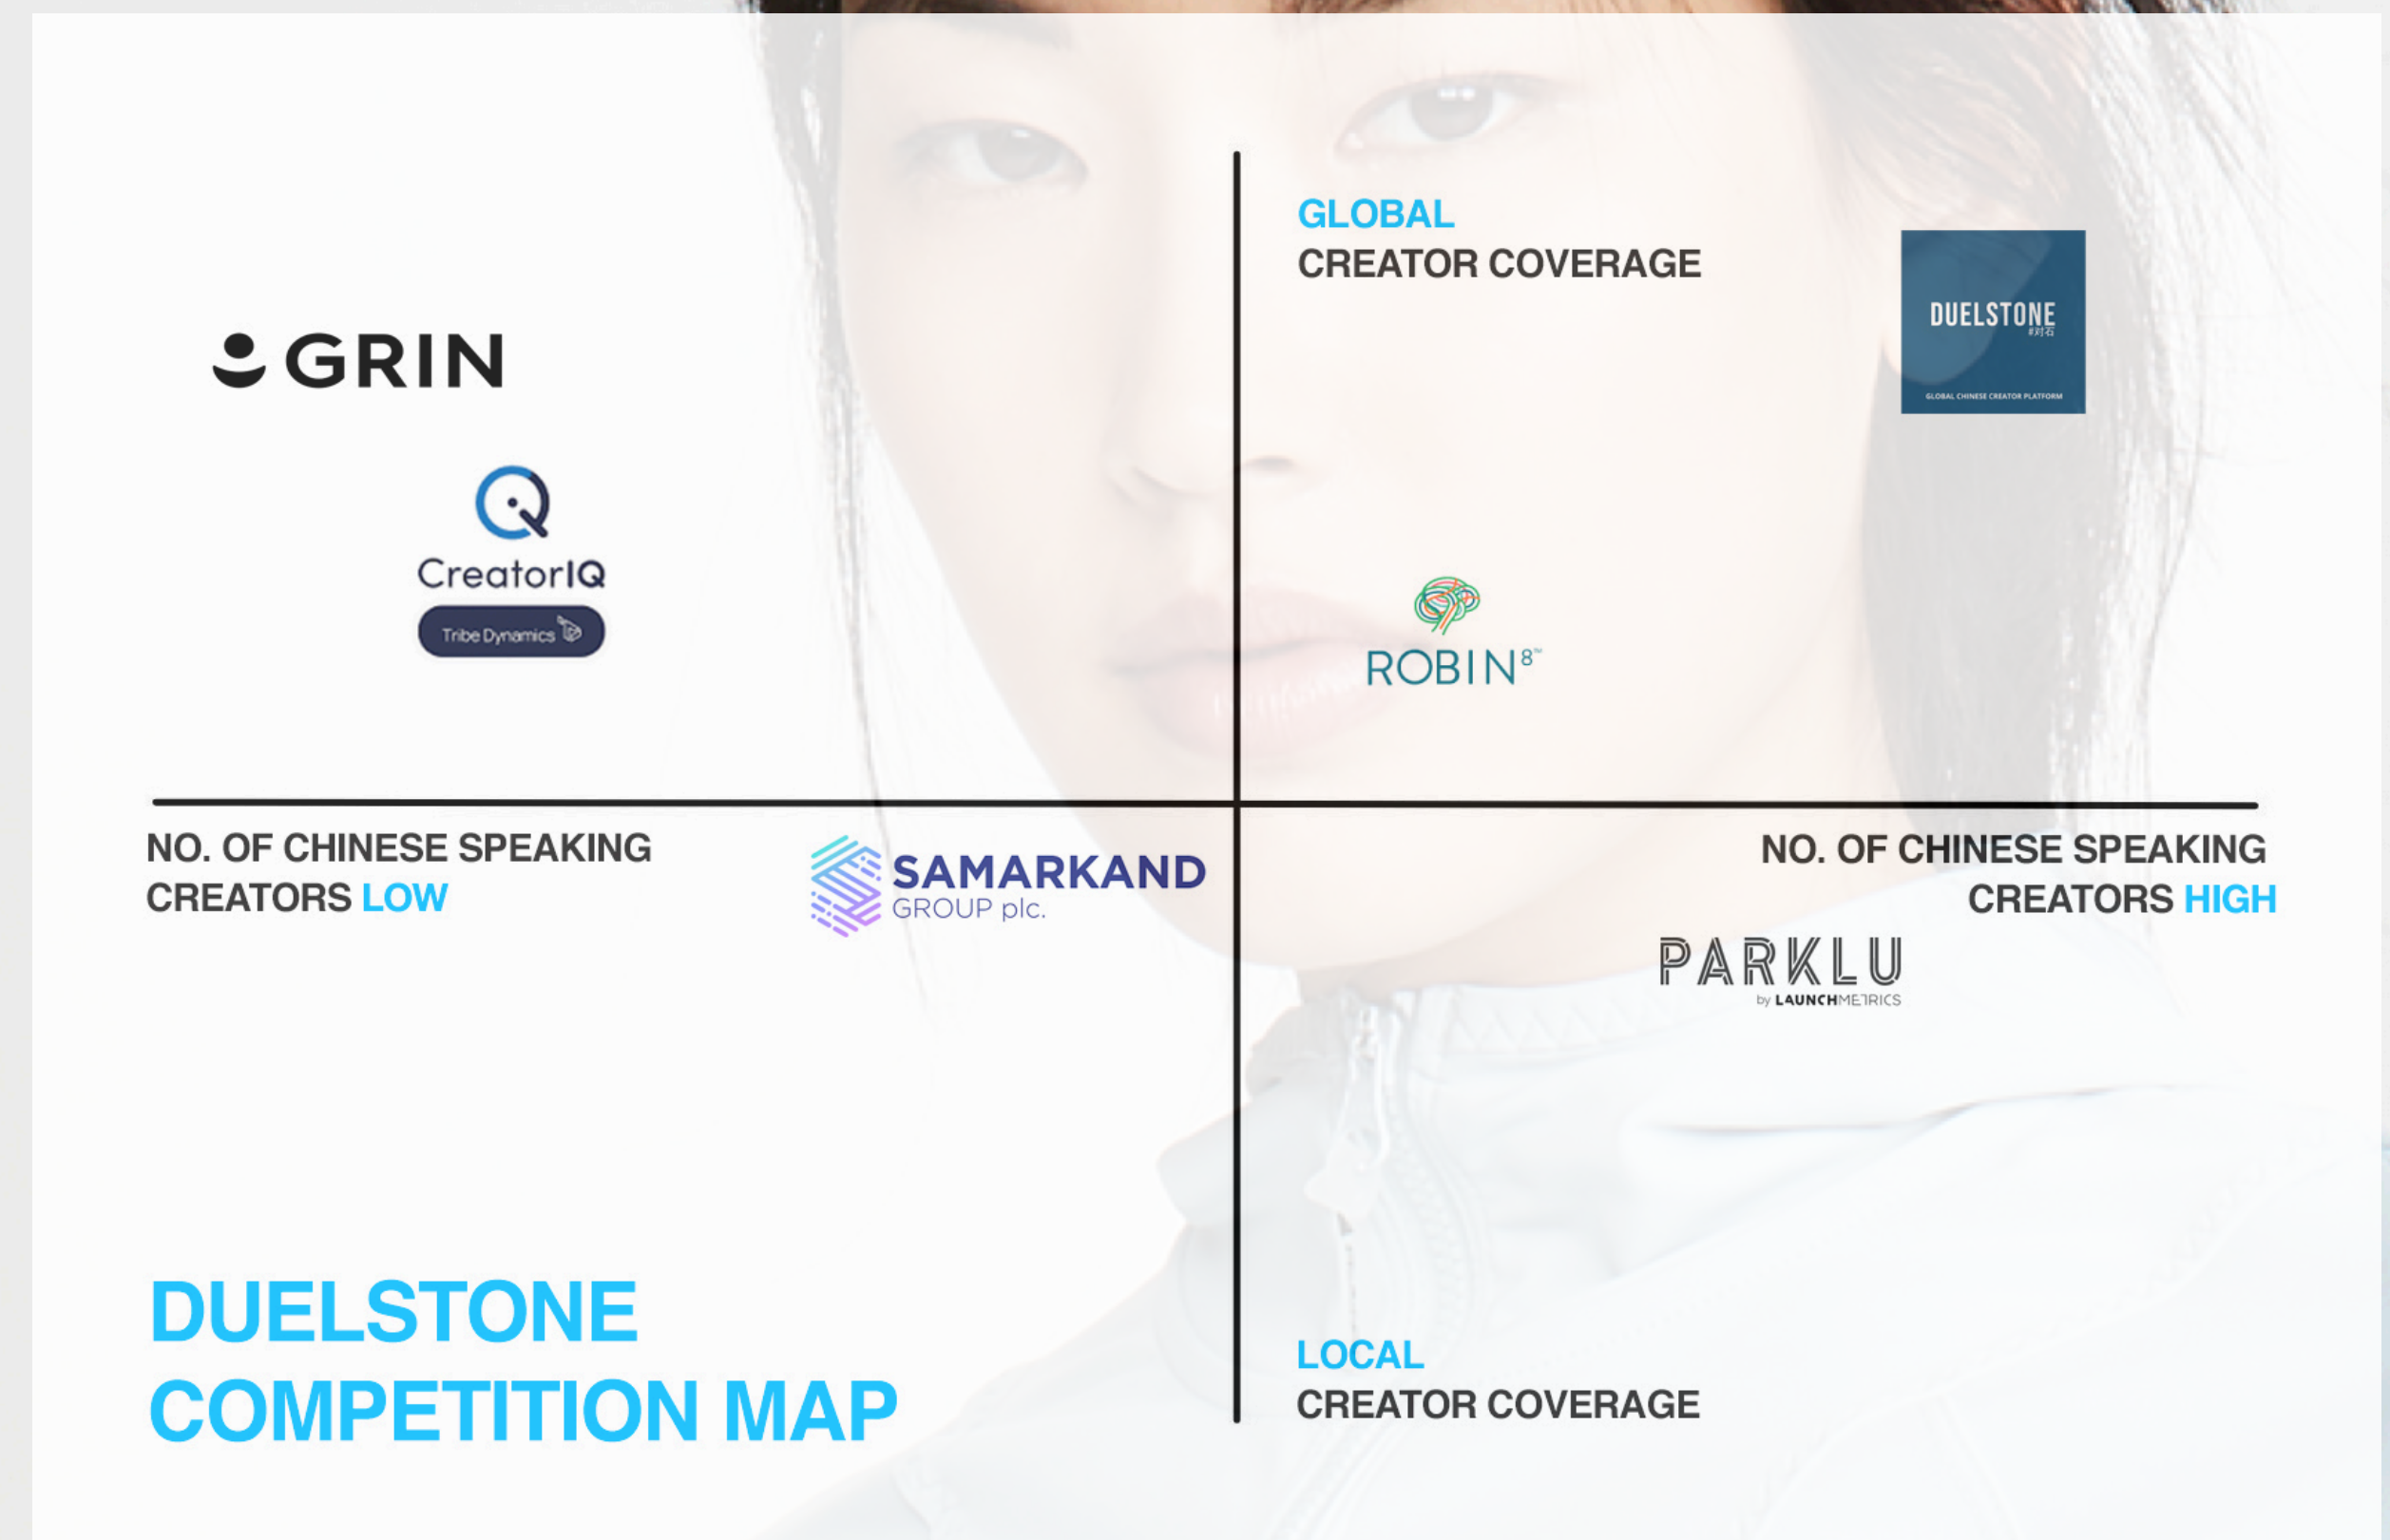

对石 DUELSTONE

Duelstone Posts are **“iterative”** meaning feedback loops support each Post in performing better than the previous. Brands switching to a new platform would brand revert back to the lower performance levels the brand encountered when starting with Duelstone. Therefore switching does not make sense.

Wholesale orders and **online retailer listings** generated by brands through Duelstone would be lost if the brand moves to another platform, and therefore a counter-intuitive decision.

POWERING NEW LEADERS

UK's leading wellness brand **Vitabiotics** used Duelstone to generate Posts that lifted demand in China for their Perfectil beauty supplements from **zero to a high USD seven figure** market leader performing at +2000% ROI in less than 8 months.

Relevant Chinese Creators in 60 countries were shipped Perfectil supplements and briefed on the superior aspects of the product.

Posts viewed and trusted by millions of shoppers in China lifted purchase intention among buyers of overseas beauty supplements.

Post intelligence enabled the brand to learn why shoppers were switching to Perfectil and use these insights to generate endlessly higher performing Posts.

Posts performance data sharing with a network of online retailers in China triggered a surge in demand to List & Wholesale buy Perfectil.
